INSTITUTION'S ENERGY POLICY DOCUMENT

In the context of utilization of energy resource like electricity the management consulted faculty, non-teaching staff and student teachers and created an awareness about the necessity of saving the electricity and the use of non-conventional energy as well as natural resources like sunlight and air.

- To utilize the natural resources of light like sunlight and air, the entire college community is trained to keep the windows and doors open on either side of the classrooms, halls and laboratories.
- To pay attention on the switching off the lights and fans when the classes or educational programs are not held.
- To remind at periodical intervals the uses of non-conventional energy and its impact on general health, eyes and body temperature.
- To educate the members of this academic institution to practice consciously planting of trees in their homes, use of plants that promote oxygen and maintaining them regularly.
- To encourage the stakeholders of the academic institution to spread the importance and uses of non-conventional and avoid the uses of conventional energy. Thus, the investment on conventional energy is reduced and non-conventional energy is promoted.
- To organize seminar /special lecture session on the topic of energy conservation policy at regular interval.

To organize some popular activities, competitions on the theme of energy conservation in a regular basis.
